Aryaveer Mankotia

aryaveer@example.com | github.com/Aryaveer009 | India

SKILLS

Languages: Python, SQL, Bash, JavaScript
AI / ML: LLMs, RAG, Prompt Engineering, Embeddings, LangChain, Hugging Face
Security: Cybersecurity, OWASP, Prompt Injection, Threat Modeling, Burp Suite, Nmap
Tools: Git, Docker, Linux, pytest, FastAPI

PROJECTS

PromptShield | Python, Typer, GitHub Actions

- Built an open-source CLI that runs 48 attacks across 7 categories against an LLM chatbot or RAG app and reports pass/fail mapped to the OWASP Top 10 for LLM Applications.
- Designed canary-secret detection that catches system-prompt leaks even when the secret is reversed, spaced out or base64-encoded.
- Added a mandatory ownership flag so the tool refuses to run against targets the user has not explicitly claimed.
- Set up GitHub Actions CI for linting, type-checking and tests.

ModelRouter | Python, FastAPI, Docker

- Built an OpenAI-compatible proxy that routes easy queries to a cheap model and hard queries to a strong model to cut LLM costs.
- Implemented a query-difficulty classifier and per-request cost tracking behind a REST API.
- Containerized the service with Docker and added a Streamlit dashboard for spend and routing decisions.

Campus Notes Q&A (sample project) | Python, RAG, SQLite

- Built a retrieval-augmented generation assistant that answers questions over lecture notes using embeddings and a FAISS vector index.
- Chunked documents and stored metadata in SQLite so answers could cite their source pages.

EXPERIENCE

Cybersecurity Intern | Security Operations (sample entry)

- Triaged security alerts and documented findings for the team.
- Ran vulnerability scans with Nmap and summarized remediation steps for engineers.

EDUCATION

B.Tech, Computer Science
